

Innovating designs inspired by the synthesis of crochet art in natural leather to enrich children's shoes

Dr. Sanaa Mohamed Fathy

Lecturer, Department of Leather Industries, Faculty of Home Economics, Helwan University

Abstract:

This study aims to try to shed light on the possibility of creating innovative designs inspired by the synthesis of crochet art with natural leather to enrich the aesthetic and functional values of girls' shoes in middle childhood (6-9) years. This research follows the descriptive method to verify the hypotheses of the research, in addition to the experimental method in the applied part of the study, and has developed (10) designs of various children's shoes and implemented using the synthesis of crochet art with natural leather to enrich girls' shoes in middle childhood (6). 9 years. The results of the research found out that there are statistically significant differences between the ten designs implemented for children's shoes in the aesthetic, functional and technical aspects, and the possibility of creating innovative designs inspired by the synthesis of crochet art with natural leather according to the evaluation of a survey of specialists (10) of faculty members of the Faculty of Home Economics. Helwan University, product users and buyers (parents of children) of the number (40) for the implemented shoes and access to the best designs. Synthesis
